

BMS - Bulk Material Spreader

What do you want to spread?

Whatever it is, chances are the versatile Stoltzfus Bulk Material Spreader is all you'll ever need for spreading these materials:

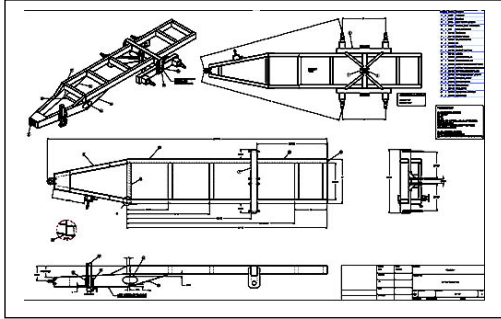

- Poultry litter
- Clean shavings
- Stockpiled lime
- Fertilizer
- Gypsum
- Compost
- Dewatered sludge
- Water treatment lime
- Lime-stabilized sludge
- Mulch and more

Spreaders pay for themselves quickly with many uses around the farm. You generally need to apply a variety of materials, and a Stoltzfus BMS spreader lets you apply just about any material that comes along.

The BMS is big enough for poultry litter and compost, tough enough for wet lime, and with the optional low-rate kit is accurate enough for fertilizer. The BMS accurately spreads a pattern up to 40' wide. Application rates range from 200 lbs per acre to well over 7000 lbs per acre.

No other spreader even comes close to this kind of versatility. You can get a Stoltzfus BMS up to 20' long that carries a 15 ton load. Plus, Stoltzfus spreaders are the ones "built like a tank." Many Stoltzfus spreaders are still hard at work after 20, even 30 years. Just think what that means for resale value. Compare the materials and workmanship. Compare the design and performance. Compare the reputation. Then you'll know what makes a Stoltzfus BMS one of the best investments you can make.

Greater reliability, longer life, faster payback

Engineered for maximum strength

With computer aided design, tolerances are tighter and parts and assembly are more consistent.

Built with the best components

We purchase the best parts and steel, and assemble them according to the engineering drawings.

Tested for precision spread patterns

In addition to a long lasting spreader, you want an accurate and reliable spreader.

Quality Details

Every Stoltzfus Spreader is designed from the farmer's point-of-view. For example, the delivery chain return is guided by a full-length track to keep the chain from sagging under the body, significantly extending the life of the chain. Our heavy duty gear box and

hydraulic spinner designs have been proven reliable for over 20 years of use under the toughest conditions. Our poly floor prevents winter freezing and the CorTen alloy pan prevents corrosion under the liner.

Stoltzfus BMS – Bulk Material Spreader Specifications

Specifications	Model 5010	Model 8016	Model 1520
Maximum Rated Load (tons)	5	8	15
Hopper Capacity (cu.ft)	137	223	400
Hopper Capacity (bu.)	109	178	318
Hopper Length	10'	16'	20'
Hopper Width	74"	74"	84"
Hopper Depth	37"	37"	49"
Vertical Side Height	6"	6"	10"
Overall Length	18'	24'	28'
Overall Width	79"	94"	102"
Overall Height	71"	74"	89"
Standard Tire Size	11Lx15	19Lx16.1	21.5Lx16.1
Wheel Track (centerline)	68"	80"	80"
Approx. Empty Weight	3,700	5,000	5,700
Materials:			
Hopper:	Steel, CorTen alloy, #304 SS		
Pan:	CorTen alloy, #304 SS		
Floor:	1/4" poly (white)
